["INDEX OPTION "] BUY NIFTY 26200 CE AT 140-145 TGT 158-166-180 SL 115

01-12-2025

10.33 AM

Description: • The 26200 CE has **fallen into a support zone near 118–122**, where buyers recently attempted to defend. There is a **bullish wick** on the most recent candle → suggests buyers stepping in. The underlying NIFTY spot on the left shows: A **pullback from 26,320 to 26,260**. **Horizontal support at 26,285** was broken and retested → mild bearish pressure but no strong follow-through., on this behalf I rec CE to Buy.

["INDEX OPTION "] BUY NIFTY 26300 PE AT 135-140 TGT 158-168-188 SL 105

01-12-2025

12.22 PM

Description: • A strong **bullish candle breakout** after consolidation. A successful **retest** near 135–138 levels. Price currently holding above that zone → **good strength**. NIFTY spot is still making **lower highs & lower lows**. No strong reversal yet. This supports **PE buying** because downside momentum is still active.

["INDEX OPTION "] BUY SENSEX 04 DEC 85700 PE @ 350 FOR THE TARGET 400-450-500 SL 230

01-12-2025

1.11PM

Description: The premium made a **strong rise earlier**, then entered a **sideways consolidation** between **345–360**. This consolidation is happening near **minor intraday support**, which is good for a PE buy. Underlying SENSEX index is **weak and showing lower highs**, which supports PE bullishness. on this behalf I rec PE to Buy.
