

DAILY RESEARCH RECOMMENDATION

["BASIC INDEX "] BUY NIFTY 26000 PE AT 105-110 TGT 128-140-148 SL 75

03-12-2025

09.26 AM

Description: **Strong Reversal From Lows**, Price bounced sharply from the lows near **26,000** on NIFTY and the PUT option reacted with a **strong bullish candle**. This confirms sellers got trapped and PE gained momentum. The long green candles in your chart indicate increasing buyer strength. Quick momentum bursts like this usually favour **continuation toward next levels**, on this behalf I rec to PE BUY

["STOCK CASH "] BUY RELIANCE @ 1537 FOR THE TARGET 1550-1560-1570 SL 1535

03-12-2025

11.13 AM

Description: The chart shows a **strong downtrend**, followed by consolidation near **1536–1538**. Your entry (1537) is positioned right at this **intraday support zone**. If Reliance holds above 1535–1536 and forms a bullish candle, a pullback toward 1545–1550 becomes likely. on this behalf I rec to BUY

["BASIC INDEX "] BUY NIFTY 25900 PE AT 100-105 TGT 118-128-140 SL 75

03-12-2025

09.26 AM

Description: NIFTY made a sharp drop early in the session. After the fall, price is consolidating in a narrow range around 25,915–25,930. This consolidation after a fall often gives **put entries once a breakdown resumes**. Bias remains weak unless NIFTY reclaims 26,000–26,030 strongly.

["BASIC INDEX "] BUY BUY SENSEX 84800 CE @ 271 FOR THE TARGET 370-450-500 SL 140

03-12-2025

12.49 PM

Description: The index is currently **pulling back after a breakout from a wedge pattern**. Strong supply zone visible around **85,050–85,120** (your marked purple zone). Price has rejected from that zone and is now retesting the wedge breakout zone. Support lies lower near **84,680–84,720**. For CE to perform strongly, index needs to hold above **84,750–84,800** and push back toward the supply zone, on this behalf I rec to CE BUY
