["BASIC INDEX "] BUY BANKNIFTY 59500 CE @ 469 FOR THE TARGET 520-540-580 SL 350

DescriptionBankNifty has **reclaimed the intraday VWAP / base** after a sharp sell-off and is now consolidating above it. The option chart shows **higher low formation** near 450–460 with **buying interest on dips**. The marked zone acts as a **demand area**, and a sustained move above **480–485** can trigger momentum expansion. Risk–reward is favorable (~1:2.5+) if price sustains above the base., on this behalf I rec to CE BUY
