

DAILY RESEARCH RECOMMENDATION

["BASIC INDEX"] BUY SENSEX 83800 PE@ 85 FOR THE TARGET120-150-200 SL 30

Description: SENSEX spot is in a **short-term downtrend** (lower highs forming). Price is near **intraday support** (~83,780–83,800). 83800 PE already bounced from lower levels → indicates some downside momentum still exists. But currently, there's also **consolidation / minor pullback** happening., hence I recommend PE
