

DAILY RESEARCH RECOMMENDATION

["BASIC INDEX"] BUY SENSEX 78000 CE AT 174 OR CMP TGT 200-228-272 SL 125

08-04-2026

12.50 PM

Description: • A call option at this strike is a directional bullish bet. It benefits if SENSEX continues moving upward with enough momentum to overcome time decay.

- Your risk is clearly defined by the SL at 125. Check whether this fits your risk per trade.
- Your targets imply a scalping / short-term momentum plan. For this to work, SENSEX must hold above nearby intraday support and show continued strength.
- Watch open interest shifts, implied volatility, and SENSEX spot levels near 77,500–78,000, as these zones often act as congestion..., **hence I recommend CE**
