

DAILY RESEARCH RECOMMENDATION

["BASIC INDEX"] BUY SENSEX 78400 CE AT 250-260 TGT 288-320-400+ SL 200

Description: • The call option buyer is expecting short-term bullish momentum in SENSEX. Based on the chart: There is a recent pullback, and the price is near a demand zone around 77,200–77,350. If the index holds above this area and starts moving upward, the call premium could bounce toward the listed targets. Break below the marked zone (around 77,000 and especially 76,900) weakens the bullish case., hence I recommend **CE**
