**Description:** • Make sure spot and futures trend are aligned with a bullish continuation (your chart shows a recent pullback from a breakout zone).

- Confirm the option's IV isn't inflated; high IV can make targets harder.
  - Check how much time to expiry is left. Short-dated calls decay fast.
  - Your RR from 440 to SL 350 is about 1:1.3 to first target, better toward the higher targets
- ., hence I recommend CE
